

Solisto.iAux Blaupunkt ; Aux In Adaptor for iPod/iPhone/iPad

The Solisto.iAux is a simple and cost effective solution to connect an iPod, iPhone or iPad to a Blaupunkt head unit. Listen to e.g. music or audio book, internet radio, ... in a very good sound quality (no FM transmitter).

The Solisto.iAux provides power to charge the battery of the iPod/iPhone/iPad as well. Please note that for more recent devices an additional adaptor (charge converter) is necessary.

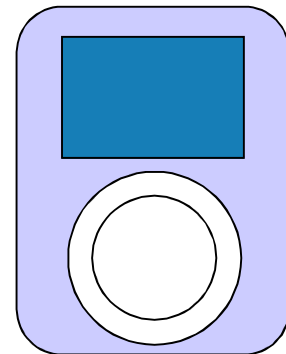

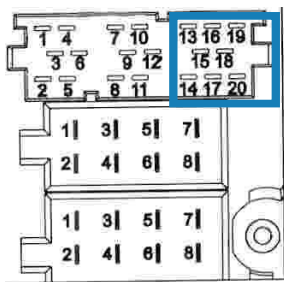

Information about our other products for car audio and home audio can be found on our website www.solisto.de.

Installation

The blue plug of the Solisto.iAux have to be connected to the back of the head unit. Lay the cable to where you want the iPod docking connector to be. It should be anywhere you can reach with ease to control the iPod/iPhone/iPad connected to it. If necessary, standard adaptor or extension cables may be used.

For most head units, the auxiliary audio input (Aux In) has to be activated manually in the head unit's systems menu. It is best practice to put the volume of the iPod/iPhone/iPad to maximum and control the sound level at the head unit. Only decrease the volume at the iPod/iPhone/iPad if the sound gets distorted.

Compatible iPod/iPhone/iPad

Solisto.iAux is charging

- iPod (3rd+4th+5th+6th Generation)
- iPod Classic
- iPod-Mini (1st+2nd Generation)
- iPod-Nano (1st+2nd+3rd Generation)
- iPod Photo
- iPod Touch
- iPhone

Charging supported with additional charge converter

- iPod Nano 4.-6. Generation
- iPod Touch 2G, 3G
- iPhone 3G[S], iPhone 4[S]
- iPad, iPad 2

Sadly, Apple changed the charging interface for the more recent generations of its mobile audio devices. Thus, an adaptor called sPod charge converter is necessary to provide power to these products. We offer such an adaptor as an accessory. All other functionalities work without using the adaptor.
